Installing the Upper Network Blank Plate

To install the upper network blank plate:

- 1 Remove the module terminator from the port next to the network slot that you want to cover.
- 2 Slide the two tabs of the upper network blank plate into the bottom of the port slot. Push downward on the upper network blank plate until it fully seats in the slot.
- **3** Push on the top of the upper network blank plate until the captive thumbscrews mate with the holes in the chassis.
- 4 Tighten the thumbscrews.
- **5** Re-install the module terminator in the port.

Removing the Upper Network Blank Plate

Note: All vacant slots must have a cover plate to ensure proper and safe operation of the library.

To remove the upper network blank plate:

- 1 Remove the module terminator from the upper-most port.
- 2 Unscrew the two captive thumbscrews securing the cover plate and pull outward on the plate.
- 3 Retain the blank plate for later use.
- 4 Install the module terminator in the upper-most port.
