## Purpose of This Release

This release corrects an issue with the StorNext API (SNAPI) client plug-in as described in the [Resolved Issues](#) section.

The SNAPI client plug-in enables communication between the Scalar i6000 and the StorNext metadata controller (MDC) where the SNAPI component is installed, in support of EDLM and Active Vault functionality.

The SNAPI 2.0.1 client plug-in is available for download by clicking the **Drivers** tab on the Web page at this location:

<http://www.quantum.com/ServiceandSupport/SoftwareandDocumentationDownloads/S6K/Index.aspx>

After accepting the end-user license agreement, download the file called **snapi-2.0.1\_120i.GE004-i6000.zip** and then install the SNAPI client plug-in.

Visit <http://www.quantum.com> for additional information about Scalar i6000 and previous releases.

---

## Firmware and Software Versions

The following table shows the firmware version and corresponding StorNext version used during SNAPI client plug-in testing. In all cases, SNAPI version 120i.GE004 was used.

Device	Firmware Version	StorNext Version
Scalar i6000	612Q.GS05701 (i8.2.1 and higher)	4.1.1/3.5.2.1
	617Q.GS01001 (i8.4 and higher)	4.2.2
	631Q.GS02201 (i10.0 and higher)	4.2.1

For more information about compatibility between SNAPI and StorNext releases, refer to the document titled StorNext SNAPI Compatibility under the "Compatibility Guides" heading on the Web page at this location:

<http://www.quantum.com/ServiceandSupport/SoftwareandDocumentationDownloads/SNMS/Index.aspx?whattab=Fifth#compatibility>

---

## Resolved Issues

The following issue was resolved for this release.

Change Request Number	Service Request Number	Description	Solution
37336	n/a	StorNext Media Copy did not copy inactive data.	Fixed.

---

## Documentation
