

Scalar i40 and Scalar i80 Library Firmware Upgrade Instructions

This document describes how to upgrade your library firmware. See the *Scalar i40 and Scalar i80 User's Guide* for more detailed information.

| Note: | HP tape drive firmware is bundled with library firmware. When you |
|-------|--|
| | install library firmware, tape drive firmware is installed at the same |
| | time. During a library firmware upgrade or downgrade, the library |
| | autolevels tape drive firmware. Autoleveling automatically updates |
| | firmware on all installed tape drives, keeping all tape drives of the same |
| | type at the same firmware level. Autoleveling will not occur if a tape |
| | drive has a cartridge loaded in it. Make sure to unload all tape drives |
| | before updating library firmware. |
| | |

Note: IBM drive firmware is not included in the library firmware bundle. The drive firmware is available on the same page as the library firmware and must be downloaded separately.

Note: If you are upgrading firmware, and you previously installed a tape drive firmware patch separately from library firmware, you must delete the patch from your library before your tape drives can autolevel to the tape drive firmware you are installing with the library firmware upgrade.

Note: If you are downgrading library firmware to an earlier version using the firmware upgrade process, library configuration settings will be reset to the factory defaults. You must manually reconfigure your library's settings.

Caution: You must upgrade your library firmware to version i6.0 (160G) before it can be upgraded to any later firmware.

Log into your library to view the latest firmware version available. Click Tools
Update Library Firmware.

The screen displays the firmware currently loaded on your library and the latest available firmware.

Note: You can also view a listing of the latest version of library firmware on the following Web site: <u>http://www.quantum.com/ServiceandSupport/</u> <u>SoftwareandDocumentationDownloads/SI40/Index.aspx</u> and click the Firmware tab.

View your library's current firmware version by selecting **Reports** > **About Library** from the operator panel, or **Reports** > **About** > **Scalar i40/i80** from the Web client.

- 2 Unload tape cartridges from all tape drives installed in the library.
- 3 Capture a library snapshot (recommended for troubleshooting in case there is a problem with the upgrade). From the Web client, select Tools > Capture Snapshot and complete the screens that follow
- 4 Save the library configuration. From the Web client, select Tools > Save/ Restore Configuration > Save System Configuration.
- **5** If the library has an Internet connection, use the Web client to update the library to the latest firmware. If the library does not have an Internet connection, use a Web browser to select a specific firmware file with which to update the library.

Update using the Web Client

a From the Web client, return to **Tools > Update Library Firmware**.

The Tools - Update Library Firmware screen displays.

b Click the check box next to **Update library firmware with the version from the Quantum Support Web site**.

Note: If a newer version is already installed on your library, you will receive a warning message.

- c Click **Read EULA** to read and click **Accept** to accept the End User License Agreement.
- d Go to Step 6.

Browse for a Specific File

- a Using a Web browser connected to the Internet go to http://www.quantum.com/ServiceandSupport/SoftwareandDocumentationDownloads/SI40/Index.aspx and click the Firmware tab.
- **b** Download the library firmware to a known location on your computer.
- c From the Web client, return to Tools > Update Library Firmware.

The Tools - Update Library Firmware screen displays.

- d Click Browse.
- e Locate the library firmware file and click Open.
- f Go to Step 6.
- 6 Click Apply.

A confirmation dialog box displays asking you to confirm that you want to update the library firmware and reboot the library.

7 Click OK to continue with the library firmware update operation.

Note: Library initialization can take approximately 9 to 23 minutes for an i40, or 14 to 40 minutes for an i80, depending on how many drives are installed. Do not interrupt the library during initialization.

The Progress Window closes automatically when the file is transfered to the library. The update will then continue without any update from the Web client. Refresh the Web client after the allotted time has passed.

If **Failure** appears in the Progress Window, the operation failed. The library will automatically reload the previous version of library firmware.

8 Log in to the library.

Note: If the library is still in the process of restarting, the Web browser may display an error page or message when you try to access or log in to the Web client.

- 9 Verify the library firmware installed successfully. Go to Tools > Update Library Firmware or view the About Scalar i40/i80 report (on the Web client) by selecting Reports > About > Scalar i40/i80).
- 10 Save the library configuration. From the Web client, select Tools > Save/ Restore Configuration > Save System Configuration.
