muCommander - Quantum Edition v1.4.2

For the Scalar LTFS 2.5.0.3 release, Quantum is including a modified version of muCommander as the recommended file browser for Windows and MacOS. Some native file browsers and applications will attempt to perform hidden file reads to gather file information for user presentation causing unexpected tape mounts and severe performance issues. Quantum's version of muCommander eliminates these issues.

Install muCommander for Windows

- 1 Go to <http://www.quantum.com/serviceandsupport/softwareanddocumentationdownloads/sltfs/index.aspx>
- 2 Select the **Downloads** tab.
- 3 From the list of downloads, click the **Download** button for the muCommander - Quantum Edition. A popup window displays.
- 4 Select the **I Accept** checkbox.
- 5 Click **Accept**.
- 6 The .zip file will download through your web browser.
- 7 Save the .zip file to your local machine.
- 8 Extract the contents of the file. The .zip file contains:
 - the muCommander - Quantum Edition .exe
 - the muCommander - Quantum Edition user instructions
- 9 Double-click the **muCommander.exe** file and follow the instructions to complete the installation.
- 10 When installation is complete, refer to the document included in the .zip file for basic instructions on how to setup and use muCommander - Quantum Edition.

Install muCommander for Mac

- 1 Go to <http://www.quantum.com/serviceandsupport/softwareanddocumentationdownloads/sltfs/index.aspx>
- 2 Select the **Downloads** tab.
- 3 From the list of downloads, click the **Download** button for the muCommander - Quantum Edition. A popup window displays.
- 4 Select the **I Accept** checkbox.
- 5 Click **Accept**.
- 6 The .dmg file downloads to your **Downloads** folder.
- 7 From the **Downloads** folder, double-click the file to begin the download.
- 8 When complete, a drive icon will display on your desktop.
- 9 Double-click the .dmg drive icon. A window displays with the muCommander icon.

- 10 Drag the muCommander icon to your **Applications** folder.
- 11 When installation is complete, refer to the document included in the .dmg file for basic instructions on how to setup and use muCommander - Quantum Edition.

General Issues

The following are important items not covered in the [Known Issues](#) section of this document.

- The SLTFS Online Help cannot be accessed by the latest versions of Firefox. To access help pages, you must use Google Chrome or Microsoft Internet Explorer. This issue also affects previous versions of SLTFS help.
- With NFS, if all resources are busy, system calls may receive an EAGAIN failure. This requires the operation to be retried by the host application.
- SLTFS does not support RealTek Ethernet cards on MacOS.
- Files copied from a Windows system to SLTFS and opened on MacOS sometimes produce an -8084 error. To avoid this error, copy to SLTFS media rather than a direct copy from Win7 to MacOS.
- On MacOS, copying files to newly formatted media can cause a dialog to display stating that a newer version already exists in the location you are trying to copy to. When the Finder displays the replace dialog, click **Yes**.
- Mac users who experience performance issues when upgrading to 2.4 will need to upgrade to 2.5.0.3 and Contact Quantum Service for addition steps that need to be taken.
- With NFS, if the Scalar LTFS appliance is restarted, users will have to unmount and remount the NFS share.
- Due to tape latency it is possible that file I/O may timeout which will require the user to retry the I/O from the host system. For more details on advanced

configuration, reference *Chapter 2 - Best Practices* in the *Scalar LTFS User's Guide*.

- Some special characters used by Mac are not supported by the LTFS format.
- The new Replication feature has replaced the tapecopy functionality.

SLTFS 2.4 FAQ

Quantum has generated a Frequently Asked Questions document pertaining to the functionality changes from SLTFS 2.3 to 2.4. This document highlights how new features work compared to previous versions and explains what features were moved or removed completely in 2.4. The SLTFS 2.4 FAQ document is available on Quantum.com.

Resolved Issues

This release of Scalar LTFS has the following resolved issues:

Change Request Number	Service Request Number	Description	Solution
60322	3667034	Volume Groups with large number of volumes may encounter performance issues.	Fixed.
60323	3667034	Volumes in a 'pending' state prior to an SLTFS failure are unrecoverable upon system restart.	Fixed.
60324	3660776	Media with a corrupted index are causing SLTFS to continually restart.	Fixed.
60325	3604386	SLTFS was incorrectly taking a drive offline if an unformatted tape was inserted in the drive.	Fixed.
60327	3684998	Replication jobs using the same data are taking increasing amounts of time to complete.	Fixed.
60492, 60965	3696960, 3689682	SLTFS unexpectedly restarted after replicating data that spanned multiple media.	Fixed.
60507	3667034	Attempting to format or assign 200+ media causes SLTFS to unexpectedly restart.	Fixed.

Known Issues

This release of Scalar LTFS has the following known issues:

Change Request Number	Service Request Number	Description	Workaround
59728		SLTFS performance issues on MacOS when upgrading to version 2.4 or above.	Contact Quantum Service.
42470		When logging into SLTFS, users may see an 'unsafe connection' warning relating to Internet certificates.	Click the button on your related Internet browser to accept and continue.
56746		A failure during a volume group merge will produce an incorrect reason for the failure.	If you receive a No Memory Available reason for a failed merge, check to make sure the new volume group doesn't exceed the set limit. The default limit for volumes per volume group is 5000.
57100		During a Remote Authentication test, a confirmation dialog may incorrectly appear.	The confirmation will ask if you want to "lose current changes" even if you haven't changed anything. Click OK and fix any errors that caused the test failure.
57366		Google Chrome may mistakenly mark extended snapshots as malware depending on your settings.	If you receive the message, "Recover Malware? This file may be harmful for your computer." disregard and select the Keep Anyway option.
