

## Product Bulletin 27

---

<b>Product</b>	StorNext® 2.8.x and 3.0 GA
<b>Summary</b>	The IRIX/Solaris Sparc-to-Linux conversion utility has been found to lose database rows, and should not be used until a new version is released.
<b>Date</b>	May 2008

---

### Problem

The script that converts between IRIX and Solaris Sparc MDC to Linux MDC has been found to lose database rows.

For this reason, the conversion utility *should not be used until a new version has been released*.

---

### Workaround

There is currently no workaround for this issue.

---

### Solution

The conversion tool supports conversion only when upgrading from StorNext 2.8.X to StorNext 3.0 GA. A new script will be released to the Quantum Software Architecture Group when the fix is completed.
