

## Product Bulletin 28

---

<b>Product</b>	All versions of StorNext® running on SUSE Linux Enterprise Server 10
<b>Summary</b>	Service Pack 2 not supported at this time
<b>Date</b>	June 2008

---

### Problem

Kernel changes in SUSE Linux Enterprise Server 10 Service Pack 2 (SLES10sp2) cause some StorNext routines to not link. Consequently, StorNext versions 2.8 through 3.1.2 do not currently support SLES10sp2.

---

### Solution

Do not install SLES10sp2. Instead, use SUSE Linux Enterprise Server 10 Service Pack 1 (SLES10sp1). The Release Notes or the Supported Platforms document for future StorNext releases will specify when SLES10sp2 is supported.
