

Product Bulletin 5

Product: StorNext[®] Management Suite

Summary: Sun Microsystems-branded QLC HBA card not supported.

Date: March 2004

The StorNext File System (StorNext FS) works with the QLC Host Bus Adapter (HBA) card, but the full StorNext Management Suite (SNMS) does not support it due to inconsistencies reporting fibre-attached libraries. Currently, ADIC is working on a resolution with Sun to provide QLC HBA support in the future.

ADIC recommends that you use the QLogic QLA 2340 card as a replacement card. For information about other supported HBA cards, refer to the SNMS Release Notes.

For further assistance, contact the ADIC Technical Assistance Center (ATAC).
