

Product Bulletin 16

Product: StorNext® 2.6.4, Build 27 and
StorNext 2.7, Build 92 and later

Summary: Windows clients may need to reboot after a File System Manager Failover

Date: June 2006

Problem: Windows clients randomly fail to reconnect to the new server after a metadata server failover, causing the client to hang when accessing SNFS file systems. This issue requires a client reboot to reconnect to the new metadata server.

Solution: Upgrade to either 2.6.4, Build 45, or 2.7.1, Build 94.
