Making copies or adaptations without prior written authorization of Quantum Corporation is prohibited by law and constitutes a punishable violation of the law. ActiveScale, DXi, DXi Accent, FlexSync, FlexTier, iLayer, Lattus, Myriad, Quantum, the Quantum logo, QXS, Scalar, StorNext, SuperLoader, Unified Surveillance Platform, USP, Vision, and Xcellis are either registered trademarks or trademarks of Quantum Corporation and its affiliates in the United States and/or other countries. All other trademarks are the property of their respective owners. Quantum specifications are subject to change.

Purpose of This Release

The DXi 5.2.0 Software release supports the DXi4800, DXi9000/91000, DXi T10, DXi9200, and DXi V5000 disk backup systems.

i Note: This release was scanned for vulnerabilities using Nessus® for vulnerability risk management, as part of Quantum's Quality Assurance (QA) process. The release code build was validated as secure.

What's New in DXi 5.2.0?

This software release features the following new features and updates:

- **Veeam 13-** Support for Veeam 13.
- **DXi T10-240 and T10-480-** Support for DXi T10-240 and T10-480 configurations.
- **DXi REST API-** Latest version of the DXi REST API.

DXi Password Requirements

- **System Users** - Passwords must be between 8-64 characters, and must include at least one upper case (A-Z), one lowercase (a-z), one number (0-9), and one special character (` ~ ! @ # \$ % ^ & * () - _ = + [] { } \ | ; : ' " , . < > / ? space).
- **IPMI and iDRAC Users** - Service login passwords must be between 8-20 characters, and must include at least one upper case (A-Z), one lowercase (a-z), one number (0-9), and one special character (` ~ ! @ # \$ % ^ & * () - _ = + [] { } \ | ; : ' " , . < > / ? space).

Product Compatibility List

The following table provides information about DXi hardware compatibility with DXi 5.2.0 Software.

Component	Description
DXi4800	• 1 Node • 1 to 2 RAID controller cards. • 0 to 4 Expansion modules (JBODs) • 1 x 1 GbE Ethernet ports • (Optional) 2 x 10 GbE Ethernet ports • (Optional) Up to 8 x 25 GbE Ethernet ports (SFP28 optical or DAC Copper) • (Optional) Up to 16 x 10 GbE SFP Ethernet ports or 16 x 10GbE Base-T Ethernet ports. • (Optional) Up to 16 x 16 Gb Fibre Channel ports (for VTL or PTT) • (Optional) Up to 8 x 100 GbE Ethernet ports (Optical or DAC Copper) • 8 TB - 315 TB usable capacity
DXi9000 SD	• 1 Node • 1 Array module (RBOD) • 0 to 9 Expansion modules (EBODs) • 1 x 1 GbE Ethernet ports • (Optional) 2 x 10 GbE Ethernet ports • (Optional) Up to 8 x 25 GbE Ethernet ports (SFP28 optical or DAC Copper) • (Optional) Up to 16 x 10 GbE SFP Ethernet ports or 16 x 10GbE Base-T Ethernet ports. • (Optional) Up to 16 x 16 Gb Fibre Channel ports (for VTL or PTT) • (Optional) Up to 8 x 100 GbE Ethernet ports (Optical or DAC Copper) • 51 TB - 1020 TB usable capacity

Component	Description
DXi9000 HD	• 1 Node • 1 Array module (RBOD) • 1 Expansion module (EBOD) • 1 x 1 GbE Ethernet ports • (Optional) 2 x 10 GbE Ethernet ports • (Optional) Up to 8 x 25 GbE Ethernet ports (SFP28 optical or DAC Copper) • (Optional) Up to 16 x 10 GbE SFP Ethernet ports or 16 x 10GbE Base-T Ethernet ports. • (Optional) Up to 16 x 16 Gb Fibre Channel ports (for VTL or PTT) • (Optional) Up to 8 x 100 GbE Ethernet ports (Optical or DAC Copper) • 204 TB - 1020 TB usable capacity
DXi9100	• 1 Node • 1-2 Array modules (RBODs) • 0-2 Expansion modules (EBODs) • 1 x 1 GbE Ethernet ports • 2 x 10 GbE Ethernet ports • (Optional) 2 x 10 GbE Ethernet ports • (Optional) Up to 8 x 25 GbE Ethernet ports (SFP28 optical or DAC Copper) • (Optional) Up to 16 x 10 GbE SFP Ethernet ports or 16 x 10GbE Base-T Ethernet ports. • (Optional) Up to 16 x 16 Gb Fibre Channel ports (for VTL or PTT) • (Optional) Up to 8 x 100 GbE Ethernet ports (Optical or DAC Copper) • 204 TB - 2 PB usable capacity

Component	Description
DXi9200	• 1 Node • 1-2 Array modules (RBODs) • 2 x 1 GbE Ethernet ports (service management) • 4 x 1 GbE Ethernet ports (array storage) • (Optional) Up to four 100 GbE (SFP28 optical or DAC copper) dual-port Ethernet cards. • (Optional) Up to four 10/25 GbE (SFP28 optical or DAC copper) quad-port Ethernet cards. • (Optional) Up to four 10 GbE Base-T quad-port Ethernet cards. • (Optional) Up to four 32 Gb Fibre Channel dual-port cards. For path to tape and VTL. • 110TB - 2200 TB usable capacity
DXi T10	• 1 Node • 2 x 10 GBase-T Ethernet ports. • (Optional) Up to 4 x 100 GbE Ethernet ports (SFP28 optical or DAC Copper). • (Optional) Up to 12 x 25 GbE Ethernet ports (Optical or DAC Copper). • (Optional) Up to 6 x 32 Gb Fibre Channel ports (for VTL or PTT). • 15 – 60 TB usable capacity (DXi T10-60). • 30 – 120 TB usable capacity (DXi T10-120). • 60 – 240 TB usable capacity (DXi T10-240). • 120 – 480 TB usable capacity (DXi T10-480).
DXi V5000	• Refer to the System Overview in the DXi V5000 Documentation Center to review the virtual machine (VM) configurations.

Resolved Issues

Issue Number	Description	Customer Number
DXE-18482	Veeam Best Practices Guide (BPG) updates.	640582
DXE-20261	Blockpool issues occur when a hypervisor disk capacity, memory, and CPU is increased and the profile no longer matches the physical settings for a DXi V5000 virtual machine (VM).	665771 689459
DXE-27624	Upon upgrade, a V5000 maybe appear to hang and never reach the "Normal" state.	
DXE-27775	Error occurs when attempting to enable Veeam (VDMS).	756744 821448 822031 847761
DXE-28815	DXi runs out of semaphores and generates a hardware failure RAS ticket.	815833 816470 816548 831779 844408
DXE-29027	Replication issues due to mismatch between maximum number of connections and maximum number of streams.	822988
DXE-29283	Password login on Veeam (VDMS) cannot be disabled.	822724
DXE-29406	StorNext file system core issue.	831175 830853 834761
DXE-29449	Email Monitor RAS ticket failure issue.	830515
DXE-29452	Hardware monitor indicates Incorrect failed status instead of degraded status for a degraded volume.	830515
DXE-29535	Solid State Drive (SSD) cache in warning status after capacity upgrade.	831341
DXE-29548	When enabling both Cloud and Veeam, GUI and CLI report errors when viewing the App Environment page or running the get status command.	

Issue Number	Description	Customer Number
DXE-29566	Reinstall with Save Data does not work. Fresh install does work.	
DXE-29644	Diagnostic file missing information.	836378
DXE-29738	/sys/class/net/*/queues/ removed from Collect Log.	838636
DXE-29757	StorNext filesystem expansion issues.	839684
DXE-29733	Reboot causes causes race condition that affects partition labeling.	838849
		837848
		838343
		843339
DXE-29912	LSU AIR configuration missing in DXi REST API	842786
DXE-29939	DART Disk I/O charts missing or contain no data.	841558
DXE-29957	I/O errors during reboot due to iSCSI connection closing.	844991
DXE-30057	QXS collect bundle missing from Service Menu.	836378
DXE-30300	Application Environment help topic not available in DXI GUI.	
DXE-30302	Veeam backup issue after upgrade to DXi 5.2.0 software.	852069
		852087
		852108
		852113

Known Issues

DXi 5.2.0 Software has the following known issues:

Issue Number	Description
DXE-25942	DART GUI banner does not display full firmware version. DART (DXi Advanced Reporting) GUI does not contain enough space to display the new full firmware version. The firmware version has changed due to use of Git code build methods. The DXi code version can still be obtained from the DART GUI.

Issue Number	Description
DXE-20388	Large DXi with extremely busy non-dedup Shares can cause Health Check and Garbage Collection to slow and use excess memory. Workaround: use dedup enabled shares. (DXi is not meant to be a primary storage device.)
DXE-26006	GUI: Can not return to home page from Disk Usage page. Customers using and ingesting data may be unable to navigate from the <i>GUI Status > Disk Usage</i> page to the GUI Home page. Workaround: Navigate to another GUI page and then navigate to the Home page.
DXE-26043	Netserver is not working properly. Usually this function is used in conjunction with Service to test the network connection from one DXi to another. Netserver is not used for any data storage functionality.
DXE-20691	CLI: Secure Email: CLI (Command Line Interface) command needs improvement. Parameters and values names are not consistent. No functionality impact. Some inconsistencies and improvements that could be made in a future release.
DXE-29453	After a software upgrade, the Notifications Email Server page might have strange characters. Functionality is not affected.
DXE-30047	Installing Red Hat Enterprise Linux 9 (RHEL9)/Rocky Linux 9.0 (Rocky9) via DAE causes a kernal panic. DAE does not currently support RHEL9/Rocky 9 or higher VMs.

Documentation

Refer to the *DXi4801 Gen2 System Installation Guide*, available on CSWeb.

- **DXi V5000 Documentation Center:** www.quantum.com/dxiv5000docs
- **DXi4800 Documentation Center:** www.quantum.com/DXi4800Docs
- **DXi9000 Series Documentation Center:** www.quantum.com/DXi9000Docs
- **DXi T10 Documentation Center:** www.quantum.com/DXiT10Docs
- **DXi9200 Documentation Center:** www.quantum.com/DXi9200Docs

Supported Backup Applications

For the current list of backup applications supported for use with DXi 5.2.0 Software:

1. Click on <https://www.quantum.com/swcompguide.aspx>

The **Support > Software Compatibility With Tape Libraries** page appears.

2. In the **Compatibility Guide** list, select **Software / Disk-Based Backup Systems**.
3. (Optional) Select your system and software from the **Storage Device** and **Application Software** lists.

i Note: If the storage device and application software are not selected, a full list of all available devices and software will appear and requires a minute or two to populate. Select your system and software for a faster-appearing, shorter list.

4. Click **Submit**.

i Note: Contact the backup application vendor for the latest software revision information.

DXi Additional Notes

Cloud Based Analytics

Cloud Based Analytics (CBA) is now enabled by default. This will allow your DXi to communicate with Quantum and provide system health and greater serviceability.

If you want to disable Cloud Based Analytics (not recommended by Quantum), do the following:

1. Go to the **Configuration > System > CBA** page.
2. Uncheck the following boxes:
 - **Enable Cloud Based Analytics**
 - **Send Events (RAD and Admin Alerts)**
 - **Process Job Requests (Log capture and upload)**
 - **Send Telemetry**
3. Click **Apply**.

Dynamic Host Configuration Protocol (DHCP)

DXi systems default to DHCP. If you do not have a DHCP server, log into the Console Desktop and set a static IP (see DXi Installation Guide for more information).

Use the IPMI Remote Console to change this IP Address and reboot the system if this address conflicts with any systems on your network.

Email Reports

Quantum recommends enabling **Email Reports**. When enabled, **Email Reports** periodically sends system configuration and status information to Quantum, including any software upgrades you have installed using the **Software Upgrade Utility**. Quantum Support can use this information to provide a better support experience in the future.

To configure Email Reports:

1. Make sure a valid outgoing e-mail server is specified on the **Configuration > Notifications > Email > Server** page.
2. (Optional) Specify any additional recipients to receive the reports on the **Configuration > Notifications > Email > Email Reports > Recipients** page.
3. Make sure a weekly **Email Reports** schedule is configured on the **Configuration > Scheduler** page. Configure two weekly recurring events: one for **Status** reports and one for **Configuration** reports.

Contacting Quantum Support

Below is information related to contacting Quantum Support as well as steps to improve your Quantum customer journey.

- [Chatbot below](#)
- [Open a Service Case below](#)
- [Use MyQuantum Service Delivery Platform below](#)
- [Use Cloud Based Analytics \(CBA\) on the next page](#)
- [Escalate a Service Case on the next page](#)
- [Contact Quantum Sales on the next page](#)

Chatbot

An AI driven Quantum Chatbot is available to ask product support questions, open a service case, or chat with a call center agent. Locate the Q box on the bottom right of a Quantum web page, such as <https://www.quantum.com/en/service-support/>.

i Note: Some ad blockers might interfere.

Open a Service Case

Use any of the following methods to open a service case:

- AI driven Quantum Chatbot. Locate the Q box on the bottom right of a Quantum web page.
- Visit the [MyQuantum](#) portal (for more information, see [Use MyQuantum Service Delivery Platform below](#)).

i Note: The MyQuantum portal is the most efficient and preferred method to open a service case.

- Visit the [Service & Support](#) page.

i Note: You can also access other Support related services.

- Call Quantum Support (see [Service & Support](#)).

Use MyQuantum Service Delivery Platform

MyQuantum is a single portal for everything Quantum. You can view assets, open service cases, receive real-time updates, and search the Knowledge Base and documentation, all through a secure, online portal.

1. Create an account and log in to the [MyQuantum Service Delivery Platform](#).
2. Register a product on [MyQuantum](#).

3. Request site access to the Cloud-Based Analytics (CBA) monitoring portal and follow the instructions to set up product(s) to connect to CBA. You can use CBA to monitor Quantum products remotely, from a single dashboard, and Quantum Support can use it to help troubleshoot products more efficiently.

Use Cloud Based Analytics (CBA)

Quantum products are equipped with a Cloud Based Analytics (CBA) agent that can provide log files and snapshots to Quantum CBA servers that are running in the cloud.

CBA enables Quantum systems to collect data regarding system and environment performance. The collected data is bundled and uploaded to the remote CBA server for analysis. You can access Quantum system performance and health results on the CBA dashboard (at <https://insight.quantum.com>) or through the MyQuantum Service Delivery Platform.

The CBA dashboard displays the analytic results of the uploaded CBA data using flexible charting tools, along with an overall health score of each Quantum system configured for the CBA account.

Refer to product documentation for product-specific information related to CBA.

Refer to the [Quantum CBA website](https://www.quantum.com/en/service-support/resources/escalation/) for general information about CBA.

Escalate a Service Case

To escalate a service case, follow the process documented here: <https://www.quantum.com/en/service-support/resources/escalation/>
